EXPERIENCE

Microsoft (MLSA), Remote — Student Ambassador

Sep 2023 - PRESENT

- It was my pleasure to organize a large online coding workshop with approximately 230 participants
- Learn Student Ambassadors are a global group of campus leaders who are eager to help fellow students, create robust tech communities, and develop technical and career skills for the future.

Nike, Remote — Frontend Developer intern

May 2023 - Sep 2023

- A small project I'm developing lets people keep track of their daily activities including the number of miles they run and the amount of water they drink daily
- I developed foundational UI/UX design skills during my internship and gained experience collaborating on large-scale codebases.

PROJECTS

Amazon clone app

- Amazon clone built with HTML, CSS, JavaScript, React.js, and Material UI. Features: Firebase auth, Git version control.
- Frontend, authentication, and collaborative version control skills improved through Amazon clone.

Snake Game

- I utilized HTML, CSS, JavaScript, React.js, and Material UI for this project.
- Building a snake game in HTML, CSS, and JavaScript offered hands-on experience in game development.

Tic-Tac-ToE-game

- Using HTML, CSS, and JavaScript, I am designing a Tic-Tac-Toe game with variable AI difficulty levels that encourage user engagement.

NPL-ChatBot

- Python-based chatbot using TextBlob and sentiment analysis for tailored

SKILLS

Languages: HTML and CSS, python, Typescript (beginner)

Technologies: Bootstrap, PyTorch, Django, Flask

Concepts: Object-oriented programming, functional programming, MVC

HOBBIES

YouTube : Coding videos(1k subscribers)

Instagram page: coding, Artificial intelligence art (50 followers)

Football, basketball, problem solving

AWARDS.

Devpost -> best game AI
